# Risk Assessment

## Key Risks & Mitigation Strategies

Medium

### Consumer Adoption

Urban consumers may not pay premium for structured craft experiences

- Launch with proven, Instagram-friendly formats (pottery, block printing). Free first-session model for early adopters.

Medium

### Artisan Supply Chain

Artisan availability, quality consistency, and retention at scale

- Build a roster of 50+ artisans across 5 clusters. Revenue-share model ensures loyalty. Train backup facilitators.

High

### Cultural Authenticity

Risk of diluting cultural heritage in pursuit of commercialisation

- Artisan advisory board. Co-creation process. GI certification tracking. No compromises on craft integrity.

Medium

### Competitive Copycat

Well-funded players (Fabindia, startups) replicating the model

- Build artisan exclusivity fast. Proprietary curriculum IP. Community lock-in through certifications.

Medium

### Talent & Facilitators

Shortage of skilled facilitators who can teach and present culturally

- Train-the-trainer program. Certify 100+ facilitators by Year 1. Partner with art schools.

Low

### Seasonality

Workshop demand may dip in summer / exam seasons

- Corporate & school segments smooth revenue. Online learning provides year-round base.

# GROWTH ROADMAP

Three Phases to ₹150 Crore

## 01 ANCHOR

*Months 0 – 6*

- ▶ Launch 2 flagship studios: Bengaluru + Delhi
- ▶ 3–5 craft verticals live (block print, pottery, Madhubani, weaving, indigo)
- ▶ Target: Urban Millennials + Corporate B2B
- ▶ Onboard 20+ artisan partners
- ▶ Revenue target: ₹3–5 Cr

## 02 SCALE

*Months 7 – 18*

- ▶ Expand to Mumbai + Jaipur (heritage hub)
- ▶ Launch online learning platform
- ▶ Craft kit D2C subscription (₹999/mo)
- ▶ 50+ artisan partners; facilitator cert. program
- ▶ School partnership pilot (10 institutions)
- ▶ Revenue target: ₹25–35 Cr

## 03 NATIONAL

*Year 2 – 3*

- ▶ Franchise / licensing model — Tier 2 cities
- ▶ Curated heritage travel products (multi-day retreats)
- ▶ Corporate learning catalog — 200+ clients
- ▶ International: Indian diaspora (US, UK, UAE)
- ▶ Revenue target: ₹150 Cr

# Competitive Advantage

## Building a Defensible Moat

### Artisan Co-Ownership

Revenue-share model makes artisans brand partners, not vendors. Creates authentic storytelling and deep loyalty that competitors cannot replicate quickly.

### Proprietary Curriculum

Certified courses and facilitator training programs create a curriculum IP moat. Certifications carry value that binds learners to the platform.

### GI-Tagged Craft Provenance

Exclusive partnerships with GI-certified artisan clusters provide traceable, authenticated provenance — a premium signal no fast-follower can fake.

### Community Network Effects

Workshop alumni communities, Discord groups, and creator networks generate word-of-mouth and recurring engagement that compounds over time.

### First-Mover Brand

No national branded premium cultural experience company exists. Early brand recognition in this whitespace creates compounding recall and PR advantages.

### Tech + Preservation Layer

AR/VR documentation of endangered craft techniques creates a digital archive IP and differentiates the brand as a cultural custodian, not just a vendor.

# STRATEGIC RECOMMENDATION

**Launch a premium hybrid cultural experience brand anchored in Craft & Textile Arts, monetised through the 'Experience → Learn → Own' flywheel.**

Target: Urban Millennials + Corporate B2B first | 2 flagship studios in Bengaluru & Delhi | Scale to ₹150 Cr by Year 3

## Opportunity

Craft & Textile Arts — highest on all selection criteria. Clear first-mover white space.

## Business Model

Hybrid 3-layer flywheel. Multiple recurring streams. Gross margins 45–80% by vertical.

## Customer

Urban Millennials as entry segment. Corporate B2B for fast revenue. Premium Travelers for margin.

## Growth Path

3-phase roadmap. ₹3–5 Cr → ₹35 Cr → ₹150 Cr. Franchise model unlocks national scale.
